

Operational carbon

H|M involvement

What's new

Consider

- a **hierarchal approach to energy efficient** design, prioritising passive design measures, energy efficient and smart systems
- **electrical heating** - developing a **Net Zero Carbon** building - increasing **flexibility** on energy network demand-
- commissioning a **Design for Performance** approach- assessing your **carbon footprint & offsetting** options -
- revisiting your **metering & maintenance strategy** - revisiting your **fit-out guides & lease agreements** -
- investing in **smarter energy management** - investing in **energy efficiency** - investing in **renewable energy generation**
