

Position Permanent, Full Time
Job Title Fire Engineering Consultant
Location London/Farnborough/Manchester

THE ROLE

An exciting opportunity has arisen within Hilson Moran’s Fire Engineering Group, for a Fire Engineering Consultant.

Applications are sought from candidates with experience providing fire safety advice on fire safety legislative compliance and design requirements to clients and professional design teams for individual buildings. Projects will range from complex high value innovative schemes for new developments, fit-outs and refurbishments through to smaller schemes.

THE INDIVIDUAL

You will be an enthusiastic individual with a relevant academic background. You will have a real interest in Fire Engineering design analysis for the built environment, and crucially—have a passion for creative and intuitive design.

You will have experience of preparing detailed fire strategy reports and providing fire engineered solutions for a wide range of building occupancies from residential through to commercial for low rise and high rise developments, with an appreciation of the commercial factors which affect design solutions for the overall development.

The ideal candidate will also have an understanding of the construction design process and business development with a proven ability to work effectively as part of a team whilst being able to manage your own time to meet deadlines.

A good understanding of passive fire protection methods and smoke control systems with a basic knowledge of fire suppression systems is essential, experience creating and reporting on Computational Fluid Dynamic fire models would be advantageous.

INTERESTED?

Please forward your CV along with a covering letter outlining your suitability for the role and your salary / package expectations [to careers@hilsonmoran.com](mailto:careers@hilsonmoran.com)

All applications will be treated in the strictest confidence. Hilson Moran is an Equal Opportunities Employer and welcomes applications from all communities.
