

# Environmental Impact Assessment Consultant

We are seeking to employ an Environmental Impact Assessor to work in our London or Manchester office

## The Role

Hilson Moran is an international multi-disciplinary practice offering design consultancy services for the built environment. Active in all sectors of the construction market, the company undertakes new buildings and refurbishment schemes in both the public and private sectors.

The Infrastructure and Environment Team within Hilson Moran advise clients on environmental and infrastructure aspects of developments at the pre-planning and construction phase of schemes, including Environmental Impact Assessment, Air Quality, Noise, Biodiversity and Nature Conservation, Water Resources and Flood Risk Assessment, Contaminated Land and Health Impact Assessment amongst other things.

We are seeking to employ an EIA Consultant on a permanent basis in our London or Manchester office.

You will get to work on a variety of projects from inception to completion, helping us to meet the environmental aspirations of our clients, whilst liaising with other members of the team to produce high quality sustainable designs and delivering work to the high standards that our clients demand.

Reporting to an Associate Consultant, your responsibilities will include, but are not limited to, the following:

- Assist in the management and delivery of Environmental Impact Assessments and Environmental Appraisals to clients, on a range of projects, including high profile schemes, across the UK and abroad;
- Assist in the completion of environmental baseline studies from a range of disciplines;
- Assist in the preparation of technical reports from a range of disciplines;
- Liaison and attendance at meetings with clients and responding to client's requests for information;
- Management of reports and data, including within Geographical Information Systems (GIS);
- Input into multi-disciplinary fee proposals;

- Day-to-day support to colleagues from other disciplines within the office;
- Attend team meetings with both internal and external disciplines, where relevant.

You will have the opportunity over time to assume greater levels of responsibility and autonomy as your professional skills develop. For permanent posts you will be mentored towards Chartership through an appropriate environmental body, such as the Institute of Environmental Sciences.

## We'd like to Hear from You If You Have Experience with

- Are motivated and enthusiastic about the environment and improving our built environments
  - Have an understanding of the EIA framework and its application on projects
  - Have an understanding of additional environmental disciplines, *e.g.* biodiversity and nature conservation, flood risk, contaminated land, health, *etc.*
  - Have an understanding of the basics of UK planning and legislation frameworks
  - Have the ability and desire to work in a team environment
  - Have a desire to work constructively in a team, finding holistic environmental design solutions
  - Have good project management and time management skills
  - Are computer literate, ideally with knowledge of GIS packages
- 
- Degree or Masters qualified in an environmental field, including Environmental Impact Assessment, Environmental Sciences or other relevant subject
  - Professional Membership of a relevant environmental body is desirable.
