

Security Consultant

We are seeking to employ a Security Consultant specialising in the design of Electronic Security Systems.

The Role

Hilson Moran is a leading independent multidisciplinary consultancy for the built environment, providing a full range of engineering services, exciting and innovative design solutions on a full range of projects from our network of offices in the UK.

We are currently seeking a proactive and enthusiastic security professional to be responsible for delivering security engineering and security consultancy services to a varied client base. Projects range from complex high value innovative schemes for commercial, residential, and retail projects to providing specific security consultancy advice including designing out crime.

You will be assisting in the delivery of security strategy and engineering solutions for single / multiple project sites, from planning to implementation stages.

Delivery will be accordance with national / regional design standards, building regulations, legislation and applicable law and include:

- Security Surveys / Vulnerability Assessments.
- Electronic Security Systems Design.
- RIBA stage security engineering.
- Production of electronic security device drawings, schematics, schedules and technical specifications.
- Security Control Room design.
- Systems integration and network capacity recommendations.

- Tender preparation.
- Construction monitoring duties including Technical Submissions and RFIs.
- Systems commissioning / Witness testing / Technical assurance.
- Soft Landings.

Projects range from complex high value innovative schemes for new commercial, residential and retail developments, from Shell & Core to Cat A /Cat B fit-outs and refurbishments.

The role will be hybrid with attendance at local regional offices when required.

We'd like to Hear from You If You Have

Proven professional experience as a Security Consultant, Electronics Engineer or Security Integrator. You will have knowledge of security design principles, technical drawings, contributing to performance and technical specifications and delivering to deadlines as part of our wider engineering teams. Experience with AutoCAD or Bluebeam will be an advantage.

A proactive, flexible, and enthusiastic consultant, with excellent written and verbal communication skills, you will work as part of multi-discipline teams, and under your own initiative. You will be highly presentable with excellent attention to detail and be able to converse professionally with clients.

Qualifications & Skills

- The successful candidate will have relevant industry or engineering qualifications.
- You will ideally have or working towards professional membership of The Security Institute / ASIS or other recognised equivalent body and hold or be working towards gaining a Security, Risk Management or Electrical / Electronics related qualification.
