

Senior Flood Risk Assessment Specialist Consultant

We are seeking to employ a Senior / Principal Flood Risk Consultant within our Infrastructure and Environment team in our London, Farnborough or Manchester offices - or home working in the Bristol area

The Role

The role is to develop the existing flood risk and sustainable drainage (SuDS) skills within Hilson Moran's Sustainability Group whilst developing both internal and external customer relationships. Experience in detailed flood risk modelling, SuDS Strategy design, the production of water resources sections of Environmental Statements and knowledge of GIS would be advantageous. Duties specific to this role include undertaking:

- Flood Risk Assessments (FRA),
- Development & design of drainage solutions (e.g. networks & SuDS),
- Hydrological assessments,
- Hydraulic & river modelling skills desirable,
- Client and regulatory body liaison,
- Project management.

The opportunity offers a highly competitive salary package and tremendous prospects for career progression within the organization.

Key skills - technically competent *i.e* recognized as specialist in field, but with aspirations to perform a wider role including project management. The candidate requires the ability to work independently with first class communication and presentation skills.

We'd Like To Hear From You If You Have

The successful candidate will have a relevant academic background. Candidates should have a good first degree in a relevant subject (e.g a science or engineering) and ideally a Masters Degree in an environmental discipline related to hydrology. This role would suit an established Consultant with proven experience preferably in a consultancy environment.
