

# Principal / Associate Environmental Consultant

We are seeking to employ a Principal or Associate Environmental Consultant to join our Infrastructure and Environment team from our office in London (hybrid working).

## The Role

Hilson Moran is an international multi-disciplinary practice offering design consultancy services for the built environment. Active in all sectors of the construction market, the company undertakes new buildings and refurbishment schemes in both the public and private sectors.

The role is to develop the existing environmental consulting skills within Hilson Moran's I&E Group whilst developing both internal and external customer relationships. The successful candidate will work on a variety of environmental projects for high profile clients in the UK and overseas and manage a team of environmental specialists, whilst undertaking project management and business development. In addition to an excellent understanding of the EIA process as a whole, the ideal candidate will also specialise in a particular EIA discipline such as ecology or contaminated land.

The role will involve:

- Technical and managerial assistance on environmental projects.
- Work as part of teams preparing EIAs and associated management plans in compliance with applicable requirements.
- Perform project delivery activities such as report writing, undertaking and organizing data collection, performing data and literature review, developing recommendations for clients, and conducting field work.
- Work within quality/budget/schedule expectations and scope-specific assignments.
- Assist with the production of fee proposals.

- Work in a collaborative way with engineers, clients and other relevant stakeholders during field activities.
- Training and mentoring of junior staff.
- A knowledge of Geographical Information Systems (GIS).
- Excellent interpersonal and communication skills

The opportunity offers a highly competitive salary package and tremendous prospects for career progression within the organisation.

## **We'd Like To Hear From You If You Have**

- The successful candidate will have a relevant academic background. Candidates should have a good first degree in a relevant subject (e.g a science or engineering) and ideally a Masters Degree in an environmental discipline.
- The candidate will be recognized as specialist in field, but with aspirations to perform a wider role including project management and business development.
- The candidate requires the ability to work independently with first class communication and presentation skills.
- This role would suit an established Consultant with proven experience preferably in a consultancy environment.

## **Interested?**
